Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 27-29 are rejected under 35 U.S.C. 102(e) as being anticipated by Loveland (6437819).

Regarding claim 27, Loveland discloses an apparatus that relates to video surveillance (Loveland: column 1, lines 5-7). This apparatus comprises “monitoring a level of confidence that the tracking system is tracking a target” (Loveland: figure 7, wherein monitoring a level of confidence is determining if a good match has been found) and “altering magnification of an image visible to the operator in response to a change in the level of confidence” (Loveland: figure 7, wherein altering the magnification is zooming out when a good match has not been found).

Regarding claim 28, Loveland discloses “the magnification is changed as the level of confidence decreases” (Loveland: column 4, lines 55-59, wherein the magnification, or zoom, is decreased when the system detects the shopper has become temporarily obscured indicating a change in the level of confidence).

Art Unit: 2621

Regarding claim 29, Loveland discloses "the magnification is decreased if the object tracking system loses track of the target" (Loveland: figure 7, column 4, lines 55-59).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:
